Germany and England

Sunlight grows the hops, but spoils the brew.

Light starts decay even in pure beer. Dark glass gives best protection against light.

In England and Germany the brewers won't use light glass bottles.

"Beer should not be exposed to the light, especially direct sunlight, as it will thereby be detrimentally affected, the light having an influence upon the albuminoids in the beer, causing the latter to become hazy,"

says no less a person than Philip Dreesbach, the eminent German expert and scientist in the Wahl-Henius Institute of Fermentology.

We have adopted every idea, every invention that could make for the purity of Schlitz beer.

Our beer was first brewed in a hut. Now our agencies dot the earth. Our output exceeds a million barrels a year.
